## Cursor Guide Full Version [Win/Mac]

1. The cursor's coordinates are always displayed on the left side of the application window. 2. Clicking the left mouse button on the application window displays the cursor coordinates and the RGB code of the pixel color. 3. Clicking the right mouse button on the application window displays the mouse cursor's coordinates only. 4. You can change the width of the font used to display the cursor coordinates. 5. You can choose the colors and the width of the line used to display the RGB code of the pixel color. 6. You can choose the colors of the background used to display the cursor coordinates and RGB code of the pixel color. 7. The coordinates of the mouse cursor are always set to the right of the color displayed. 8. You can hide the program window or display it on top of other windows. 9. The application works with any Windows version. 10. You can easily save the installed application on your system. 11. You can make your cursor guide application the system-wide default application. Note: When you click the right mouse button on the application window, the Mouse Pointer will change to the crosshair. Cursor Guide Tutorial: When you have installed the application, you can click the mouse button to open it. When you first run the application, you will see the application's "Starting..." screen (see image below). The first time you run the application, you have to configure it. You can do this by clicking on the "Main Settings" tab. In the "General Settings" tab, you can change the background color and the foreground color used for displaying the cursor coordinates and RGB code. In the "Mouse Settings" tab, you can configure which of the mouse buttons are used for displaying the cursor coordinates and RGB code of the pixel color. You can choose the number of pixels displayed on the screen for the cursor coordinates, the RGB code of the pixel color, and the mouse cursor. You can also choose the color of the cursor coordinates and the RGB code of the pixel color. You can choose the font used to display the mouse cursor coordinates and the RGB code of the pixel color. You can choose the number of pixels used for the font used to display the cursor coordinates and the RGB code of the pixel color. You can choose the background color and the foreground color used to display the cursor coordinates and the RGB code of the pixel color.

### What's New in the?

The program draws the mouse cursor position in the screen. You can edit the cursor position and press the user-defined key to bring up the tooltip with the current cursor position (such as coordinates of the cursor on the screen, RGB color of the cursor pixel on the screen, and cursor speed). Support on the .NET Framework: The program is compatible with all .NET Framework-based platforms. Version History: June 2015 - Fixed compatibility with .NET 2.0 and 2.0 SP1 Customer reviews: - Friendly GUI, simple and easy to use - Show a tooltip when you press a key to display the current cursor position - Free, open source Example screenshot: Cursor Guide is a lightweight, yet handy application that displays information about the current position of your mouse cursor, such as the cursor coordinates and the RGB code of the pixel color. You simply have to press the user-defined key (or key combination) to display the information. The application can be set to show cursor data on every mouse event or just when you click. Description: The program draws the mouse cursor position in the screen. You can edit the cursor position and press the user-defined key to bring up the tooltip with the current cursor position (such as coordinates of the cursor on the screen, RGB color of the cursor pixel on the screen, and cursor speed). Support on the .NET Framework: The program is compatible with all .NET Framework-based platforms. Version History: June 2015 - Fixed compatibility with .NET 2.0 and 2.0 SP1 Customer reviews: - Friendly GUI, simple and easy to use - Show a tooltip when you press a key to display the current cursor position - Free, open source Screenshot: Cursor Guide is a lightweight, yet handy application that displays information about the current position of your mouse cursor, such as the cursor coordinates and the RGB code of the pixel color. You simply have to press the user-defined key (or key combination) to display the information. The application can be set to show cursor data on every mouse event or just when you click. Features: \* Works under .NET Framework 2.0 or later. \* Displays the coordinates of the cursor, RGB color of the cursor pixel, and cursor speed. \* Mouse status: If a cursor is not placed on the screen, the program displays "No cursor" instead of coordinates, color, and speed. \* All cursor information can be displayed only when you press a key to bring up the tooltip. Requirements: \* Microsoft Windows with .NET Framework 2.0 or later. \* You need to set a user-defined key or key combination for the program to display the cursor information on every mouse event. Limitations:

---

**System Requirements:**

\* Windows 7 or later \* 8GB RAM or more \* 2GB Graphic card \* Intel core i3 1. Launch Steam and install Sabotage on Steam 2. Select Sabotage at the game selection screen 3. Launch the game and enjoy it! (please note that we have not developed this game yet and the developers take no responsibility for any damage to your computer)
