The application is a simple and user-friendly solution to find the information about USB devices that are not visible in Windows Explorer. It provides the list of all devices connected to the PC, and the information about each device is displayed in one window. The user can: - sort the list of connected devices alphabetically, by protocol number, by manufacturer, by device type, etc. - select the desired device for detailed information display - display the detailed information about the selected device by pressing the button.

ChipGenius looks for devices connected to the computer. If a device is connected to a USB port, it is displayed in the list with the name of the port. If the device is not present in the list, it can be disabled.

ChipGenius is portable and can be installed on any USB drive.

ChipGenius requires only .NET framework version 1.1 and its binary is stored in the LocalFolder(C:) folder. ChipGenius was created as a free tool for the purpose of the general public. ChipGenius was developed using C# programming language and its code is written in Windows 7/XP/Vista. ChipGenius provides you with a lot of information about each piece of hardware, but this is not all that the application displays. In fact, the main focus is on providing details about the flash drive, which is the device in question here. As described above, ChipGenius shows a number of data points related to this equipment. Among them, you will find the device model, the serial number, the manufacturer and the date of the hardware creation. Besides this, there is another field dedicated to showing a detailed description of each of the flash device. This will include the firmware version, the flash chip vendor, the chip model, and the number of flash components. Of course, ChipGenius does not only show these details, but you can use it to copy them to the clipboard. It is possible to print the report, save it as an HTML file, or export it as an Excel file. All the data presented by ChipGenius is listed in ascending order, making it very easy to navigate through the details.

What's new ChipGenius 3.0 New in this version: --Added a few reports in the Main window; --Added a menu bar to the top of the screen; --Updated the software in order to be more compatible with modern operating systems; --Removed the Advanced window and the main window.
