What's New in the VisioForge Media Monitoring Tool Live?

VisioForge Media Monitoring Tool Live is a live video fingerprinting tool that is capable of comparing clips and identify positive matches. The software is a reliable tool for media monitoring, since it is able to mark the occurrence of an advert in the daily TV broadcast. The software uses the live stream from the webcam as source for comparison. Description: VisioForge Media Monitoring Tool Live offers a convenient solution, since it is capable of identifying the advert occurrence and mark the exact moment. The software requires a video recording device, such as a webcam, in order to obtain the input live stream from the television. Description: The advert sample, on the other hand must be loaded from a local folder. The software compares the commercial with 5-minute segments of broadcast and it is capable of determining whether or not it was aired in that particular interval. Description: Video sources and decoding If the software identifies a positive match of the advert sample in the broadcast, it instantly marks down the time and the specific video. The software can save the segments of TV broadcast in which it identifies the advert occurrence, as evidence. Moreover, it can save the list as an XML file. Description: The video sources are the live stream from the webcam and the local file. You can set the video resolution for the input stream, so that it matches the one from the advert sample. Additionally, you may increase the duration of the broadcast segment used for comparison.
