Ever wanted to fire up your computer and feel as though you are in a big, powerful internal combustion engine? While most desktop computers do not have the necessary hardware to emulate an internal combustion engine, you can get a taste of that powerful feeling with The Roto-matic Screensaver. The screensaver is a simulation of the principles of the internal combustion engine and shows you how the cylinder is fired up with a hammer and compressed air. The Roto-matic Screensaver also simulates the explosion, showing you why the engine is so much more powerful than a regular car engine. The Roto-matic Screensaver offers a unique simulation of the internal combustion engine, putting you in touch with all of the heart-pounding action of the real thing. Experience the visceral thrill of firing up your computer and feeling like you are in a big, powerful internal combustion engine. Try the Roto-matic Screensaver today! Emulate a 1920s car, and look at your machine as it would have been back in the 1920s. The Scarabemobile Screensaver is a stylized remake of a 1920s vehicle, complete with its tachometer and brass dials. This version of the 1920s car has been entirely redesigned by its creator, Tim Clement. The Scarabemobile Screensaver emulates the look of a car in the 1920s, with its perfect lines and classic features. The new car has its own dynamics, making it feel like a true roller coaster ride! The Disney Screensaver is a collection of animated stills and a model of the vehicle featured in the Disney film 'Cars'. The Disney Screensaver is a great way to celebrate the animated film classic and the vehicles featured in it. The Disney Screensaver features pictures of iconic cars from the movie and a model of the race car Lightning McQueen uses throughout the movie. The Disney Screensaver also includes a selection of animated stills from the movie, showing a variety of the cars and scenes. The Gizmo Screensaver is a classic from the

The role of the thyroid gland in the sexual differentiation of the rat fetus was studied using, as a model, the R. norvegicus castration-virginity reaction. It was shown that in R. norvegicus the sex differentiation of the rat fetus is genetically controlled by the X-chromosome, which is presumably identical to the Y-chromosome in the rat. The effect of thyroidectomy on the expression of the X-chromosome inactivation, as well as the role of thyroid hormones in this process, were studied in the late prenatal and early postnatal 1d6a3396d6

Very good , 22/05/2009 Was this helpful? Yes | No | Report abuse 3 of 3 people found this review helpful. Awesome , 19/04/2007 Overall this is a really good screensaver. The pictures are all good quality, and there's an excellent selection. The effects are more or less what I expected, but they are still really nice to look at. There's also a small selection of options for customisation in the settings menu. Was this helpful? Yes | No | Report abuse 3 of 3 people found this review helpful. To describe factors associated with response to intravenous immunoglobulin (IVIg) in refractory status epilepticus (RSE). Retrospective analysis of medical records for adults admitted for RSE. We searched the electronic medical record system and identified all patients admitted to our facility for RSE between 2001 and 2010. We performed a retrospective chart review of all patients with RSE who received IVIg. We categorized patients as responders if they had ≥50% reduction in seizure frequency after an IVIg infusion, and as non-responders if they did not achieve this outcome. Of the 86 patients admitted for RSE, 32 (37%) received IVIg. Twenty-three patients (72%) were responders. Responders had a shorter length of RSE (29 ± 18 vs 63 ± 67 min, p = 0.05) and were less likely to have autoimmune comorbidities (33% vs 79%, p = 0.01). The median length of hospital stay was significantly longer in responders (26 ± 13 vs 13 ± 11 d, p
