It's a new stealth game with role-playing elements and also it contains a revolutionary system of tower defense elements. At first you will be put in a good position to invade enemies by setting up defense towers and rooms. And then when they will try to attack you will make them weaker. Next, when the time comes, you must be alert to invaders and avoid attacks from their numbers. By advancing through the levels you will face more enemies and advance in the story. If you need help with

something, you can use gestures or words. And then you will raise defense towers. In Red Beard Labyrinth you will become a warrior, slowly, by the hands of three opponents. This is a game about strategy and guts. You will find use of traps that make you raise defense towers. And you will be conducting your attacks, the hardest is the chase. The art of deception comes to play and you will face a surprise attack. Let's prepare for this fight! How to make this improvement? In the game Red Beard Labyrinth you can set defense towers in four different places: -on the right side in the enemies' room, -in the middle of the enemies' room, -at the right side in the corridor, -on the right side in the enemies' room, and and the left side in the corridor. You can set defense towers in one of the four places and if the player and enemy are standing in the middle of one place, he will be able to run through both. For this very important improvement, we decided to redesign the water and make it more watertight, so it wouldn't break the pipes. The task of a defense tower is to shoot attackers. The tower starts shooting with one laser, and then with each enemy, you will need to add more lasers. The

laser's speed increases according to your fighting level. For defense towers you can add lasers and customize them. Laser's speed increases according to your fighting level. We improved the defense towers by making their lasers more accurate and by doing this we made them stronger. For the task of additional improvements, we thought about changing the attack ring for each type of weapon. We made a new armor for heroes, upgrading it by adding new elements and also added the possibility of autoblast. The developers are still working on the

The game Lithium City is available on the Playstation4, Xbox One, and PC platforms. Created by the small indie team, Frogg Studios, it has enjoyed great critical success

since its release. It is a top down shooter where your only ally is the gravity gun. A small, underfunded team of genetically engineered mutants, you are sent in to wipe out the Lithium City's ruling group, the Legion of Fire. The game offers a modular level building system, day & night cycle, player stats, and customisable hardware. As you progress through the game, you'll keep finding upgrades to your gravity gun, and you'll unlock new weapons and abilities.
